

Akt Pathway Activation

The Big Picture, in a SNAP

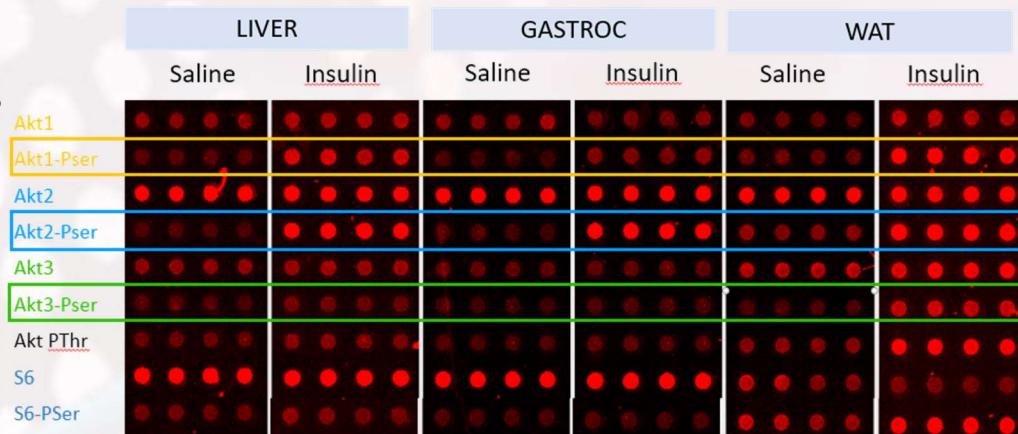

The SnapChip™ is perfectly suited to quickly and efficiently study the Akt pathway. The cross reaction-free, multiplex platform allows for a unique combination of assays, such as isoforms and phosphospecific antibodies, side-by-side.

Rapid & Easy alternative to >10 Western Blot

11-plex Kits

24 samples & 8 replicates

- • **Akt-1** total & P-Ser473
- • **Akt-2** total & P-Ser474
- • **Akt-3** total & P-Ser472
- **Akt** P-Thr308
- • **S6** total & P-Ser235/6
- • **mTOR** total

~1h hands-on time • reproducible (CV<15%) • wide dynamic range • highly sensitive • compatible with tissues and cells lysates • mouse and human (Akt-3 = mouse preferred)
